

## Sourcecode for Setting Up Jenkins Pipeline to Deploy Docker Swarm:

```
Pipeline Script pipeline {
  agent any
  stages {
    stage('Initialize') {
      steps {
        echo 'Hello
World'
      }
    }
    stage('Image build') {
      steps
      {
        echo 'Image build
successfully'
      }
    }
  }
}
```
